

The TV Weather Forecast

"Hello, everybody! Well, again today, the news isn't very good. My advice is to wear your coat and rubber boots and, especially, take your umbrella.

Unfortunately, this drizzle is going to last for the next few days. So rent a good film, get out your board games, go to the movies. In short, find something interesting to do – inside!"

Questions

1- Why does the weather girl say, "the news isn't very good"?

2- What weather is she predicting?

3- Is this bad weather recent? Why?

4- Is the situation going to get better in the next few days? What makes you think that?
